Redakteur/Editor
Christo Munnik

Die skouseisoen is lekker aan die gang. Oral hoor jy van lede wat die skou geniet het en ook gewen het met hulle duiwe. Ongelukkig is daar altyd diegene wat maar loop en kerm oor die beoordeling en die reëlings wat nie vlot geloop het tydens die skou nie. Sulkes sal daar maar altyd onder ons duiwe volkie wees en meeste van ons aanvaar dit maar so.

In hierdie uitgawe het ek die resultate van die eerste twee skou wat ek ontvang het geplaas met ‘n paar fotos op die buiteblaaie. Ek wil ‘n beroep doen op die streekbesture om asseblief iemand aan te stel wat die fotos tydens die skou kan neem. Daar is altyd iemand met ‘n kamera byderhand en deesdae kan dit nog makliker met die “smartphones” geneem word. Dit stop ongelukkig ook nie daar nie want as dar iemand was wat fotos geneem het moet ek na daai persoon soek en hom ook sovêr kry om die fotos vir my aan te stuur. Dit bemoeilik my werk net meer

Soos almal noual gesien het is daar ‘n nuwe program wat ek gebruik om die boekie te doen. Ek leer nog die program maar sal regkom. Verskoon maar as ek baie kleur insit ek probeer nog om dit reg te doen sodat die boekie naderhand soos die nuusbriewe van oor die see kan lyk. Wees asseblief net geduldig.

Ek sal dan ook eenof ander tyd in lyn kom met die tyd wat ek die boekie publiseer. Ek gaan dit so by die laaste week van die maand deurstuur na die webblad toe vir die volgende maand maar dit neuk nog bietjie met die gesukkel.

Dan maar net weer die artikels vir die boekie van lede af. Ek plaas nou maar ou artikels uit ander oorde net om iets in die boekie te hê. Groot asseblief mense stuur tog vir my artikels in dit sal nogal help julle kan dit maar glo.

Artikels asseblief

Watch your thoughts ; they become words.
Watch your words; they become actions.
Watch your actions; they become habits..
Watch your habits; they become character.
Watch your character; it becomes your destiny.

Krasnodarer Tumblers

Submitted by Simon Jordaan
From Pigeon Talk

The Krasnodar tumbler a very popular breed in the city of Krasnodar (Russia) and among pigeon Clubs there. Krasnodar Tumblers have long beaks or close to short beaks, but there are no other differences. These pigeons are quite easy to keep and breed, and they tend to be great parents. They fly at a very high altitude for long periods of time and have a strong tumble. In Russia, the breed became more popular in the last several years and spread throughout the country.

The Krasnodar Tumblers have several different colors and short muffs. They can be either plain headed or shell crested.

Deworming Pigeons

by Charles Marias
Submitted by Christo Munnik

Over the last two years I have not put as much into looking after my birds as I used to, and found that this can be disasterous. The following observations have been noticed:

1. Lost a lot more birds than I should.
2. Breeding averages dropped dramatically.
3. Birds did not win at shows.
4. Lost contact with old friends.

Found lots of pinholes and lice.

These are only a few results of not looking after your pigeons. During this period I lost a lot of birds, as well as feeders and show pigeons. Generally the birds did not have the normal vigour they used to and those that got sick would slowly start sitting around and not eating and one day just die. I thought it was overcrowding and perhaps one of the bacteria diseases. They were given antibiotics but the deaths continued. One day I decided to open one of the birds and to my horror found hundreds of round worms in the intestine of the bird. This process is done by cutting the bird open down the keelbone after defeathering. The crop and intestines are split open with a razor blade. Carefully observe to find worms. It is advisable to do this type of operation if one has a lot of birds that are thin and die.

To avoid this situation before giving any fancy medicines, deworm at least four times a year. There are lots of dewormers on the market, the most common is Tramisol and Piperazine and are definately effctive. Worms are in my opinion the most common reasonfor death in a pigeon cage. If you do not have internal parasites, disease is a lot less common, a bird is weakened by worms and other diseases take over.

Very recently I received a new magazine from America called ‘American Pigeon Review’. In my opinion this is one of the best pigeon magazines in the world. In this magazine I found an article on deworming. Here they mention a drug called Invermectin which kills both internal and external parasites and would be usegul in any pigeon loft. I did some looking around and found it was available in South Africa under the name of Ivomac at a concentration of 0.08% m/v Ivermectin made by LOGOS AGVET of America. Unfortunately it is very expensive at R85/liter in one liter bottles. I have worked out that the dose is 0.15 ml down the throat or 2cc/l drinking water. To check this I have given my birds up to 0.3ml and do not find a problem. On the birds I have given this drug to I have had fantastic results. One young bird that did not want to moult and started moulting one week

Webpage - www.fancypigeon.co.za Cell: 083 626 6003

National Ringmaster - E-mail: safpa.rings@axxess.co.za Cell: 082 565 9022 Fax2mail: 086 730 3229

after being treated and has also gained weight. The lice I saw on the birds before treatment were gone within one day of treatment. I am working on testing Ivomec but can say it works and looks safe. If it is totally effective as the first results indicate it would be useful in my cage. At this stage I know it works down the throat but still must prove it works in the water.

At present my birds are better than they have been for a long time and this due to only one thing called CARE. Believe me, I know without effort in this pigeon game you can never succeed even if you have the best birds.

(This article were published by Kobus Snyman in The Fancy Pigeon of February 1990 and also in the Birmingham Roller magazine of Randfontein Birmingham Rollers in May 1991 by Cora Miunnik the Editor)

Bodemtuimelaars

Deur wyle Wynand Wessels
Ingedien deur Christo Munnik

Kort aantekeninge oor Bodemtuimelaars.

Inleiding

Aangesien hierdie ras 'n unieke spesie is, raak baie mense gou moedeloos om met hom te boer. Daarom wil ek baie graag 'n paar sake regstel in verband met die aanhou, teel en afrigting van Bodemtuimelaars.

Aanhou van Bodemtuimelaars

Dit is 'n voldonge feit dat die meeste mense hierdie duiwe aankoop nadat hulle 'n vertoning bygewoon het op 'n duiweskou of by 'n lid daarvan gesien het. Soos dit met elke ras gaan, is daar sekere vereistes wat gestel word, naam-

lik;

1. Aangesien hierdie duiwe nie kan vlieg nie, Is dit ‘n vereiste om hulle apart van ander duiwe te hou. Indien dit nie gebeur nie, word hulle maklik verdruk by kosbakke, en sodra daar na hulle gepik word, is sy enigste verdediging ‘n rolbeweging in trurat. Indien die eienaar die rol bly toelaat, sal die duif se lewe heel verkort word en sy teelvermoë ook daarmee heen wees.
2. Indien u die duiwe in hulle eie hok het, let daarop dat die kosbak sowel as die waterbak plat op die grond staan en nie op ‘n baksteen of enigeiets anders nie, anders kan die afstandroller probleme kry met voeding.
3. Vermy onnodige geraas en gehardloop voor die hokke. Dit versteur die duif se senustelsel en veroorsaak abnormale rolbewegings in die hok.

Teel

Die duiwe teel maklik en is baie goeie ouers wat maklik twee kuikens grootmaak. Net weer ‘n paar vriendelike waarskuwings.

1. Onthou daar moet gelet word op twee belangrike dinge voordat u teelpare uitsoek. Hierdie twee dinge is tipe en werkverrigting (performance) aangesien die duiwe vertoners is, verloor baie mense die tipe van die duif uit die oog. As u tipe verloor, word werkverrigting ook ingeboet.

Vergewis jouself van die standaard van die duif en besluit dan wat jy graag wil teel, byvoorbeeld enkel-, dubbel- of afstandrollers. Deur goeie seleksie kan jy tipe en werkverrigting saam vas teel. Onthou dat ouer duiwe ook maar soos die mens agteruitgaan. Soms begin hulle vlerke hang en daar kom bokbaarde uit, veral by mannetjies. Bogenoemde sê nie dat die duif ‘n swak teelduif is nie.

2. Plaas ‘n broeiblik of -houer op die grond, sodat die duif maklik daarin kan sit en broei. Oop neste skep soms ‘n probleem insoverre dat, as die duif opstaan en hy klap sy vlerke, hy/sy ‘n agteroor salto maak en dan so die eiers kan breek.

3. Sit gereeld badwater in die hok om sodoende die duif in staat te stel om af te koel en ook ekstra vog daar te stel vir beter uitbroei van eiers.

Pasop dat die bad nie dieper as 100mm (4’) is nie, anders verdrink die duiwe. (ek het ondervinding daarvan). Onthou altyd, hulle kan nie vlieg nie.

4. Die teel van afstandrollers is soms ‘n probleem, veral as twee goeie rollers saam is. Eerstens is paring ‘n probleem, want, sodra die duif se voete die grond verlaat, rol hy/sy. Maar onthou, ‘n man is ook nie ‘n klip nie, en derhalwe slaag hulle ook om die taak suksesvol af te handel. U kan help deur die duiwe in ‘n hok van 60cm vierkant te plaas waar hulle alleen is, sonder intimidasie van ander duiwe. Die afstandroller voer goed as die kuikens eers daar is.

Afrigting

1. Enkel- en dubbelrollers word op ‘n tafel van 1 meter vierkant laat rol. Onthou om ‘n lap op die blad te plaas anders gly die duif as hy’sy begin rol.

2. Afstandrollers moet op kort gesnyde gras laat rol word. Wees baie versigtig

Webpage - www.fancypigeon.co.za Cell: 083 626 6003

National Editor - E-mail: cora.christo@gmail.com - Cell: 076 391 5800

om nie duiwe in ru-veld te laar rol nie, u sal die duiwe beseer en die kanse om oë te verloor is baie goed.

3. Dra sorg dat u minstens ses weke voor ‘n skou alle gebreekte vere verwyder, sodat nuwe vere kan uitgroei.

Hierdie artikel is deur Wyle Wynand Wesels geskryf en in 1990 het dit in Die Sierduif verskyn. Dit was ook in die Birmingham Roller boekie, Skaarsnuus, van die Randfontein Distrikte Birmingham Rollers geplaas in Maart 1991 deur Cora Munnik die redakteur.

Resep vir pikblokke

deur Johan Munnik
Ingedien deur Christo Munnik

Hier volg 'n resep wat my oorlede pa en sy broer baie jare gelede gebruik het om pikblokke vir duiwe te maak. Ek is seker almal het wel iewers 'n resep vir pikblokke wat hulle self maak maar kyk maar na die een. Hierdie is 'n versterkmiddel vir duiwe. Dit maak bene en vlerke sterk en gee veral krag vir broeiduiwe in die broeiseisoen en die duiwe is gewoonlik mal daaroor. Julle sal voorwaar nie spyt wees as julle dit gebruik nie.

15 kg Potklei
10 kg Skulpgruis
4 kg Landboukalk
1 kg Blomswael
2 kg Growwe sout
1 kg Houtskool (fyngemaakte bosveld houtskool nie brikette nie)
2 kg Beenmeel
60 ml Lugols Iodene

Gooi al die bestandele bymekaar en meng met water tot 'n klei en smeer dan so 50 mm dik blok en sny dit in koeke soos botter. Plaas in die son om te droog en gee vir jou duiwe om aan te pik.

As jy nie potklei kry nie, gebruik enige gewone grond. Grawe 'n gat so een meter diep en gebruik daardie grond onder in die gat. Moeinie grond of klei gebruik wat die laaste twee jaar met kunsmis bemes kon gewees het nie.

Die berig is ook uit die nuusbrief van Randfontein Distrikte Birmingham Rollers geneem wat vir die Redakteur Cora Munnik gestuur was deur Johan Munnik.
